

Deloitte provides **Robotic and Cognitive Automation (RCA) services** to help our clients address their strategic and critical operational challenges. We help clients in a number of ways, ranging from shaping automation strategies and identifying key opportunities to designing and implementing robotic and cognitive enabled business operations and processes at scale, as well as providing robust automated managed services. Our approach places business outcomes and successful workforce integration of these RCA technologies at the heart of what we do, driven heavily by our deep industry and functional knowledge. Our thought leadership and strong relationships with both established and emerging tool vendors enables us and our clients to stay at the leading edge of this new frontier.

Our global Deloitte firm has a large and growing capability, with a range of thought leaders. For more information within the United States, please contact Peter Lowes at [plowes@deloitte.com](mailto:plowes@deloitte.com). For more information within the UK and Europe, please contact John Middlemiss at [jmiddlemiss@deloitte.co.uk](mailto:jmiddlemiss@deloitte.co.uk).
